BUILDING CAMARADERIE

Firefighting is a team activity, and a bond of trust is essential to the safe and accurate execution of each mission. By designing attractive dayrooms and kitchens, providing fitness rooms with quality equipment, and shrinking and simplifying one-person spaces, the design of the fire station itself can increase camaraderie. These spaces each have significant potential to build morale, encourage station pride, and improve the time spent as a team.

FRIDLEY CIVIC COMPLEX *Fridley, MN*

ON-SITE TRAINING

Continuing training and education is important for all fire staff. However, off-site training can be difficult to organize and frequently comes with significant costs. Incorporating training features into the design of the fire station is a cost-effective way to build fire department skills. With careful planning, a new fire station can offer hands-on training opportunities for the full scope of services modern departments provide: basic ladder and hose deployment, search and rescue, basic and advanced life support, rope rescue, confined space extrication, etc.

OPTIMIZING RESPONSE TIME

Response times are the primary drivers of both site and station layout. The most successful stations are planned with a strong organizational logic, which is based on a thorough understanding of how the firefighters will use the building. Every decision, from the large scale (building orientation and site topography), to the mid-scale (alerting package integration and entrance points into the apparatus bays), to the small scale (door hardware selection and light switch locations) can affect response times for good or bad. These factors must each be checked for impact against response time criteria.

BKV GROUP CAN DELIVER

BKV Group's integrated team has successfully completed more than 85 fire station projects across the country. We maintain an in-house research program dedicated to ongoing analysis of the latest national discussions, programmatic trends, and emerging construction technologies to provide better buildings for our clients. BKV Group is a client-focused design firm that understands the process of project management. Our highly experienced staff fosters an atmosphere of cooperation to make the process as fun and collaborative as possible.
